EDUCATION

Johns Hopkins University *starting Fall 2018*
Ph.D. in Computer Science
Advisors: Daniel Povey, Sanjeev Khudanpur

Indian Institute of Technology Guwahati *June 2017*
B.Tech. in Computer Science & Engineering
GPA: 9.35/10
Thesis: Relation extraction in clinical text using deep learning

PROJECTS

Irony detection in English tweets January 2018

- Used circular cross-correlation between tweet text and hashtags to model irony and transfer learning from pretrained DeepMoji model for in-text irony detection
- Achieved 70% accuracy on validation set in SemEval 2018 Task 3

Relation classification in biomedical text Bachelor Thesis
Guide: Prof. Ashish Anand, Dept. of CSE

- Implemented a novel CRNN model to learn long and short term dependencies and evaluated attention-based pooling
- Achieved state-of-the-art performance on two benchmark datasets (i2b2 and DDI) without any manual feature engineering
- Recently devised a Graph CNN model to leverage information from dependency parse of the sentence; this outperforms earlier model.

Spatial Transformer Networks Fall 2016
Guide: Prof. Arijit Sur, Dept. of CSE

- Used STNs for activity prediction from egocentric images
- Achieved performance comparable to state-of-the-art on GTEA and Intel Egocentric Vision datasets with extremely fast convergence.

Pattern recognition in multidimensional fuzzy sets Summer 2015
Guide: Prof. Frank Rhee, Hanyang University

- Proposed an algorithm to select multidimensional fuzzy membership functions according to data, using Wilcoxon's nonparametric tests
- Extended the method for high-dimensional data using dimensionality reduction approaches like PCA, kernel PCA, probabilistic PCA, and t-SNE
- Worked on improving clustering performance of fuzzy ART algorithm by integrating Interval Type-2 approach into vigilance parameter computation and improved classification results by 5-10%

EXPERIENCE

Samsung Research Institute Bangalore June 2017 - June 2018
Research Engineer *Bangalore, India*

- Conceptualized and implemented several key features like undo, selective delete, etc., as part of Context Engine team in Conversational Intelligence
- Devised a bit truncation method to reduce word embeddings size for on-device AI; achieved 75% compression with 95% correlation in word similarity task

Microsoft India May 2016 - July 2016
Software Development Engineering Intern *Hyderabad, India*

- Developed a cross-platform mobile application in Xamarin Forms for OEM digital contracting system
- Evaluated various notification services and implemented GCM for push notifications
- Conceptualized statistics APIs to improve business efficiency

ACHIEVEMENTS

Recepient of **INAE Travel Grant Scheme** by Govt. of India for oral presentation at WCCI 2016

Recepient of **Kalyani Research Scholarship** from Alumni Affairs (IIT Guwahati) for publishing at an international conference during B.Tech.

Offered **INSPIRE scholarship** by Dept. of Science and Technology, Govt. of India, for being among the top 1% in AISSCE-2013

TECHNICAL SKILLS

Programming Languages	Python, C, C++, Java, C#
Libraries & Frameworks	Tensorflow, Keras, PyTorch
Software	MATLAB, Visual Studio, Eclipse, Android Studio, LaTeX
Operating Systems	Linux, Windows
